TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
120:		
Bregar-----	Poorly suited-----	Droughty, small stones, depth to rock.
Bregar-----	Poorly suited-----	Too arid, droughty, small stones.
Tusk-----	Well suited-----	
122:		
Bregar-----	Poorly suited-----	Droughty, small stones, depth to rock.
Cleavage-----	Poorly suited-----	Droughty, small stones.
Tusel-----	Suited-----	Droughty.
131:		
Benin-----	Poorly suited-----	Too arid, rooting depth, excess salt.
133:		
Benin-----	Poorly suited-----	Too arid, rooting depth, excess salt.
141:		
Beoska-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Bluewing-----	Poorly suited-----	Too arid, droughty, too sandy.
143:		
Beoska-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Broyles-----	Poorly suited-----	Too arid, excess salt, excess sodium.
144:		
Beoska-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Dun glen-----	Poorly suited-----	Too arid.
145:		
Beoska-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Beoska-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Weso-----	Poorly suited-----	Too arid, excess salt, excess sodium.
151:		
Blackhawk-----	Poorly suited-----	Too arid.
152:		
Blackhawk-----	Poorly suited-----	Too arid.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
154: Blackhawk-----	Poorly suited-----	Too arid.
Golconda-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
155: Blackhawk-----	Poorly suited-----	Too arid.
156: Blackhawk-----	Poorly suited-----	Too arid.
Clurde-----	Suited-----	Too arid, excess sodium.
157: Blackhawk-----	Poorly suited-----	Too arid.
Broyles-----	Poorly suited-----	Too arid, excess salt, excess sodium.
158: Blackhawk-----	Poorly suited-----	Too arid.
Trocken-----	Poorly suited-----	Too arid, droughty, small stones.
160: Bliss-----	Suited-----	Too arid.
161: Bliss-----	Suited-----	Too arid, erodes easily.
Chiara-----	Poorly suited-----	Droughty, excess sodium.
163: Bliss-----	Suited-----	Too arid.
Shabliss-----	Poorly suited-----	Excess sodium.
165: Bliss-----	Suited-----	Too arid.
Dugchip-----	Poorly suited-----	Excess salt, excess sodium.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
166:		
Bliss-----	Suited-----	Too arid.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
Shabliss-----	Poorly suited-----	Excess sodium.
167:		
Adelaide-----	Poorly suited-----	Droughty, excess salt, excess sodium.
Blackhawk-----	Poorly suited-----	Too arid.
Bliss-----	Suited-----	Too arid.
169:		
Bliss-----	Suited-----	Too arid.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
171:		
Bubus-----	Poorly suited-----	Too arid, excess salt, excess sodium.
174:		
Bubus-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Needle peak-----	Poorly suited-----	Excess salt, excess sodium.
178:		
Bubus-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
184:		
Chiara-----	Poorly suited-----	Droughty, excess sodium.
McConnel-----	Poorly suited-----	Excess salt.
185:		
Chiara-----	Poorly suited-----	Droughty, excess sodium.
Dacker-----	Poorly suited-----	Rooting depth.
McConnel-----	Suited-----	Too arid, droughty.
186:		
Chiara-----	Poorly suited-----	Droughty, excess sodium.
Hunnton-----	Suited-----	Too arid, droughty.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
187:		
Boger-----	Poorly suited-----	Droughty.
Chiara-----	Poorly suited-----	Droughty, excess sodium.
Chiara-----	Poorly suited-----	Droughty, excess sodium.
188:		
Chiara-----	Poorly suited-----	Droughty, excess sodium.
Chiara-----	Poorly suited-----	Droughty, excess sodium.
190:		
Beeox-----	Poorly suited-----	Too arid, excess sodium.
Oxcotel-----	Poorly suited-----	Too arid, rooting depth, excess sodium.
191:		
Beeox-----	Poorly suited-----	Too arid, excess sodium.
Connel-----	Suited-----	Too arid, excess sodium.
192:		
Beeox-----	Poorly suited-----	Too arid, excess sodium.
Bliss-----	Suited-----	Too arid.
200:		
Davey-----	Poorly suited-----	Excess salt.
201:		
Davey-----	Suited-----	Too arid, too sandy.
202:		
Davey-----	Suited-----	Too arid, too sandy.
203:		
Davey-----	Suited-----	Too arid, droughty, too sandy.
Goldrun-----	Poorly suited-----	Too sandy.
204:		
Blackhawk-----	Poorly suited-----	Too arid.
Davey-----	Suited-----	Too arid, too sandy.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
205:		
Davey-----	Suited-----	Too arid, too sandy.
Hawsley-----	Poorly suited-----	Too arid, droughty, too sandy.
206:		
Broyles-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Davey-----	Suited-----	Too arid, too sandy.
Dun glen-----	Poorly suited-----	Too arid.
207:		
Davey-----	Suited-----	Too arid, too sandy.
Pumper-----	Poorly suited-----	Too arid, excess salt, excess sodium.
208:		
Davey-----	Suited-----	Too arid, excess salt.
210:		
Connel-----	Suited-----	Too arid, excess sodium.
Flue-----	Poorly suited-----	Excess sodium.
211:		
Flue-----	Poorly suited-----	Excess sodium.
Golconda-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Snapp-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.
212:		
Flue-----	Poorly suited-----	Excess sodium.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
213:		
Flue-----	Poorly suited-----	Excess sodium.
Puett-----	Poorly suited-----	Too arid, droughty.
215:		
Flue-----	Poorly suited-----	Excess sodium.
Snapp-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.
Snapp-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
216: Flue-----	Poorly suited-----	Excess sodium.
217: Flue-----	Poorly suited-----	Excess sodium.
218: Flue-----	Poorly suited-----	Excess sodium.
Rodock-----	Suited-----	Too arid, excess salt.
Snapp-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.
222: Bloor-----	Poorly suited-----	Excess salt, excess sodium.
231: Dun glen-----	Poorly suited-----	Too arid.
233: Dun glen-----	Poorly suited-----	Too arid.
241: Sojur-----	Poorly suited-----	Too arid, droughty, small stones.
250: Connel-----	Suited-----	Too arid, excess sodium.
Davey-----	Suited-----	Too arid, too sandy.
Goldrum-----	Poorly suited-----	Too sandy.
251: Connel-----	Suited-----	Too arid, excess sodium.
252: Connel-----	Suited-----	Too arid, excess sodium.
253: Connel-----	Poorly suited-----	Excess salt.
McConnel-----	Suited-----	Too arid.
254: Connel-----	Suited-----	Too arid, excess sodium.
Zevadez-----	Suited-----	Too arid, excess sodium.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
255: Connel-----	Suited-----	Too arid, excess sodium.
McConnel-----	Suited-----	Too arid, droughty.
257: Connel-----	Suited-----	Too arid, excess sodium.
258: Connel-----	Poorly suited-----	Excess salt.
262: Golconda-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Snapp-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.
263: Bliss-----	Suited-----	Too arid.
Connel-----	Suited-----	Too arid, excess sodium.
Golconda-----	Poorly suited-----	Too arid, excess salt, excess sodium.
270: Goldrun-----	Poorly suited-----	Too sandy, soil blowing.
271: Goldrun-----	Suited-----	Too arid, droughty, too sandy.
272: Goldrun-----	Suited-----	Too arid, droughty, too sandy.
274: Benin-----	Poorly suited-----	Too arid, rooting depth, excess salt.
Goldrun-----	Poorly suited-----	Too sandy, soil blowing.
275: Goldrun-----	Poorly suited-----	Too sandy, soil blowing.
Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
281: Golsum-----	Poorly suited-----	Rooting depth, erodes easily.
Harcany-----	Well suited-----	
Spinlin-----	Poorly suited-----	Rooting depth.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
290: Burrita-----	Poorly suited-----	Droughty, small stones, rooting depth.
Havingdon-----	Poorly suited-----	Droughty, small stones, rooting depth.
292: Gowjai-----	Suited-----	Too arid.
Havingdon-----	Poorly suited-----	Droughty, small stones, rooting depth.
Walti-----	Poorly suited-----	Rooting depth.
302: Essal-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Isolde-----	Poorly suited-----	Too arid.
Playas-----	Poorly suited-----	Too arid, droughty, excess salt.
305: Essal-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Hawsley-----	Poorly suited-----	Too arid, droughty, too sandy.
Isolde-----	Poorly suited-----	Too arid.
307: Essal-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Isolde-----	Poorly suited-----	Too arid.
Tresed-----	Poorly suited-----	Too arid, excess salt, excess sodium.
311: Croesus-----	Poorly suited-----	Droughty, small stones.
Hackwood-----	Well suited-----	
Harcany-----	Poorly suited-----	Small stones.
312: Cleavage-----	Poorly suited-----	Droughty, small stones.
Hackwood-----	Well suited-----	
Harcany-----	Poorly suited-----	Erodes easily.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
321: Humboldt-----	Suited-----	Excess salt, excess sodium.
322: Humboldt-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
325: Humboldt-----	Suited-----	Excess salt, excess sodium.
Wendane-----	Poorly suited-----	Too arid, excess salt, excess sodium.
330: McConnel-----	Poorly suited-----	Excess salt.
331: McConnel-----	Poorly suited-----	Excess salt.
333: McConnel-----	Suited-----	Too arid, droughty, too sandy.
Shabliss-----	Poorly suited-----	Excess sodium.
335: McConnel-----	Suited-----	Too arid, droughty.
338: McConnel-----	Poorly suited-----	Excess salt.
Pumper-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Whirlo-----	Poorly suited-----	Too arid, excess sodium.
340: Boger-----	Poorly suited-----	Droughty.
Soughe-----	Poorly suited-----	Droughty, small stones.
342: Boger-----	Poorly suited-----	Droughty.
Goosel-----	Suited-----	Too arid, droughty, excess salt.
Soughe-----	Poorly suited-----	Droughty, small stones.
343: Boger-----	Poorly suited-----	Droughty.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
351:		
Goldrun-----	Poorly suited-----	Too arid, droughty, too sandy.
Playas-----	Poorly suited-----	Too arid, droughty, excess salt.
Prideen-----	Poorly suited-----	Too arid, rooting depth, excess salt.
352:		
Davey-----	Suited-----	Too arid, too sandy.
Goldrun-----	Poorly suited-----	Too sandy, soil blowing.
Kleck-----	Poorly suited-----	Rooting depth.
360:		
Needle peak-----	Poorly suited-----	Excess salt, excess sodium.
363:		
Batan-----	Poorly suited-----	Rooting depth, excess salt, excess sodium.
Goldrun-----	Poorly suited-----	Too sandy.
Needle peak-----	Poorly suited-----	Excess salt, excess sodium.
370:		
Wieland-----	Poorly suited-----	Rooting depth.
Wieland-----	Poorly suited-----	Small stones, rooting depth.
380:		
Bullump-----	Poorly suited-----	Erodes easily.
Tusel-----	Suited-----	Droughty.
381:		
Bullump-----	Suited-----	Erodes easily.
Hackwood-----	Well suited-----	
Tusel-----	Suited-----	Droughty.
391:		
Aycab-----	Poorly suited-----	Droughty.
Rock outcrop-----	Not rated-----	
403:		
Orovada-----	Suited-----	Too arid, excess salt.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
406: Orovada-----	Suited-----	Too arid, excess salt.
407: Orovada-----	Suited-----	Too arid, excess salt.
409: Goldrun-----	Suited-----	Too arid, droughty, too sandy.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
410: Bliss-----	Suited-----	Too arid, too sandy.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
411: Dugchip-----	Poorly suited-----	Excess salt, excess sodium.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
417: Connel-----	Suited-----	Too arid, excess sodium.
Orovada-----	Suited-----	Too arid, excess salt.
420: Bubus-----	Poorly suited-----	Too arid, excess salt, excess sodium.
431: Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
432: Goldrun-----	Poorly suited-----	Too arid, droughty, too sandy.
Playas-----	Poorly suited-----	Too arid, droughty, excess salt.
Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
435: Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
436: Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Valmy-----	Poorly suited-----	Excess salt, excess sodium.
Valmy-----	Poorly suited-----	Excess salt, excess sodium.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

437: Davey-----	Poorly suited-----	Excess salt.
Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
438: Bubus-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Preble-----	Poorly suited-----	Too arid, excess salt, excess sodium.
440: Prideen-----	Poorly suited-----	Too arid, excess salt, excess sodium.
441: Prideen-----	Poorly suited-----	Too arid, excess salt, excess sodium.
452: Kingsriver-----	Suited-----	Excess salt.
453: Kingsriver-----	Suited-----	Too arid, excess salt.
460: Rad-----	Suited-----	Too arid, too sandy, excess salt.
461: Rad-----	Suited-----	Too arid, excess salt, excess sodium.
462: Rad-----	Suited-----	Too arid, excess salt, excess sodium.
470: Raglan-----	Poorly suited-----	Too arid, excess salt, excess sodium.
471: Raglan-----	Poorly suited-----	Too arid, excess salt, excess sodium.
474: Kleck-----	Suited-----	Too arid, droughty, depth to rock.
Raglan-----	Poorly suited-----	Too arid, excess salt, excess sodium.
480: Rebel-----	Suited-----	Too arid, excess salt, excess sodium.
487: Rebel-----	Suited-----	Too arid, excess salt.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
490: Rose creek-----	Suited-----	Excess salt, excess sodium.
491: Rose creek-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
492: Rose creek-----	Suited-----	Too clayey, excess salt, excess sodium.
501: Enko-----	Suited-----	Too arid, too sandy, excess sodium.
502: Enko-----	Suited-----	Too arid, too sandy, excess sodium.
Goldrun-----	Poorly suited-----	Too sandy.
503: Enko-----	Suited-----	Too arid, excess salt.
504: Enko-----	Suited-----	Too arid, excess salt.
Shabliss-----	Poorly suited-----	Excess sodium.
505: Enko-----	Suited-----	Too arid.
507: Enko-----	Suited-----	Too arid, excess salt, excess sodium.
Orovada-----	Suited-----	Too arid, excess salt, excess sodium.
Shabliss-----	Poorly suited-----	Excess sodium.
511: Mazuma-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Trocken-----	Poorly suited-----	Too arid, excess sodium.
520: Devada-----	Poorly suited-----	Droughty, rooting depth.
Lunder-----	Poorly suited-----	Rooting depth.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
522: Hunnton-----	Suited-----	Too arid, droughty, excess salt.
Lunder-----	Poorly suited-----	Droughty, small stones, rooting depth.
530: Shabliss-----	Poorly suited-----	Excess sodium.
532: Enko-----	Suited-----	Too arid, excess salt.
Shabliss-----	Poorly suited-----	Excess sodium.
Valmy-----	Poorly suited-----	Excess salt, excess sodium.
533: Connel-----	Suited-----	Too arid, excess sodium.
Shabliss-----	Poorly suited-----	Excess sodium.
534: Puett-----	Poorly suited-----	Too arid, droughty.
Shabliss-----	Poorly suited-----	Excess sodium.
536: Dugchips-----	Poorly suited-----	Excess salt, excess sodium.
Enko-----	Suited-----	Too arid, excess salt.
Shabliss-----	Poorly suited-----	Excess sodium.
537: Bliss-----	Suited-----	Too arid.
Genaw-----	Poorly suited-----	Droughty.
Shabliss-----	Poorly suited-----	Excess sodium.
543: Connel-----	Suited-----	Too arid, excess sodium.
Pumper-----	Poorly suited-----	Too arid, excess salt, excess sodium.
544: Pumper-----	Poorly suited-----	Too arid, excess salt, excess sodium.
Weso-----	Poorly suited-----	Too arid, excess salt, excess sodium.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
545:		
Davey-----	Suited-----	Too arid, too sandy.
Dun glen-----	Poorly suited-----	Too arid.
Pumper-----	Poorly suited-----	Too arid, excess salt, excess sodium.
551:		
Carstump-----	Poorly suited-----	Rooting depth.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
552:		
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Vanwyper-----	Poorly suited-----	Droughty, small stones, rooting depth.
553:		
Ninemile-----	Poorly suited-----	Droughty, rooting depth, erodes easily.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Tusk-----	Well suited-----	
555:		
Alyan-----	Poorly suited-----	Small stones.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Tusel-----	Suited-----	Droughty.
557:		
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
558:		
Anawalt-----	Poorly suited-----	Too arid, droughty, rooting depth.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Vanwyper-----	Poorly suited-----	Droughty, small stones, rooting depth.

TABLE 6.--SUITABILITY FOR RANGELAND SEEDING--Continued

Soil name and map symbol	Limitation rating	Restrictive features
559: Devada-----	Poorly suited-----	Droughty, rooting depth.
Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Rock outcrop-----	Not rated-----	
561: Sonoma-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
562: Sonoma-----	Poorly suited-----	Excess salt.
563: Sonoma-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
564: Sonoma-----	Poorly suited-----	Excess salt.
566: Paranat-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
Sonoma-----	Poorly suited-----	Excess salt, excess sodium, too crusty.
567: Sonoma-----	Poorly suited-----	Too arid, excess salt.
573: Hackwood-----	Well suited-----	
Harcany-----	Poorly suited-----	Small stones.
Spinlin-----	Poorly suited-----	Small stones, rooting depth.
574: Hackwood-----	Well suited-----	
Spinlin-----	Poorly suited-----	Small stones, rooting depth.
Tusel-----	Suited-----	Droughty.
580: Ninemile-----	Poorly suited-----	Droughty, rooting depth.
Softscrabble-----	Poorly suited-----	Rooting depth.
Sumine-----	Suited-----	Too arid, droughty, erodes easily.

163: Bliss-----	Moderate: cemented pan seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Shabliss-----	Severe: cemented pan seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
165: Bliss-----	Moderate: cemented pan seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Dugchip-----	Moderate: cemented pan slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan too sandy

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt slope	Limitation: erodes easily
166: Bliss-----	Moderate: cemented pan seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Orovada-----	Moderate: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Shabliss-----	Severe: cemented pan seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: excess salt cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
167: Bliss-----	Moderate: cemented pan seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
Blackhawk-----	Severe: cemented pan seepage	Severe: excess salt seepage piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan too sandy
Adelaide-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
169: Bliss-----	Moderate: cemented pan seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt slope	Limitation: erodes easily
171: Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
174: Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Needle Peak-----	Slight	Moderate: piping	Severe: slow refill	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
178: Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Preble-----	Severe: seepage	Severe: piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing
184: Chiara-----	Severe: cemented pan slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: erodes easily cemented pan slope
McConnel-----	Severe: seepage	Severe: excess salt seepage	Severe: no water	Limitation: deep to water	Limitation: slope soil blowing droughty	Limitation: erodes easily too sandy soil blowing
185: Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Dacker-----	Moderate: cemented pan seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
McConnel-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: droughty	Limitation: too sandy
186: Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Hunnton-----	Severe: seepage slope	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan slope
187: Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: erodes easily cemented pan

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Boger-----	Severe: cemented pan slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones slope depth to rock
Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
188: Chiara-----	Severe: cemented pan slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: cemented pan large stones slope
Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: erodes easily cemented pan
190: Becox-----	Severe: seepage	Severe: excess sodium piping	Severe: no water	Limitation: deep to water	Limitation: percs slowly rooting depth slope	Limitation: erodes easily
Oxcotel-----	Severe: seepage	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: excess sodium percs slowly slope	Favorable
191: Becox-----	Severe: seepage	Severe: excess sodium piping	Severe: no water	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily soil blowing
Connel-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: droughty	Limitation: too sandy
192: Becox-----	Severe: seepage	Severe: excess sodium piping	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily soil blowing
Bliss-----	Severe: slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan slope
200: Davey-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
407: Orovada-----	Moderate: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
409: Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope soil blowing	Limitation: erodes easily soil blowing
Goldrun-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
410: Bliss-----	Moderate: cemented pan seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope soil blowing	Limitation: erodes easily soil blowing
411: Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope soil blowing	Limitation: erodes easily soil blowing
Dugchip-----	Moderate: cemented pan slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan too sandy
417: Orovada-----	Moderate: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Connel-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: soil blowing droughty	Limitation: too sandy soil blowing
420: Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
431: Preble-----	Severe: seepage	Severe: excess salt piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
432: Preble-----	Severe: seepage	Severe: excess salt piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: erodes easily percs slowly rooting depth	Limitation: erodes easily percs slowly
Goldrun-----	Severe: seepage slope	Severe: excess salt seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
Playas-----	Slight	Severe: excess salt hard to pack ponding	Severe: slow refill salty water	Limitation: flooding percs slowly ponding	Limitation: percs slowly ponding droughty	Limitation: percs slowly ponding
435: Preble-----	Severe: seepage	Severe: excess salt piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: erodes easily percs slowly rooting depth	Limitation: erodes easily percs slowly
436: Preble-----	Severe: seepage	Severe: piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing
Valmy-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: slope soil blowing droughty	Limitation: soil blowing
Valmy-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: erodes easily soil blowing droughty	Limitation: erodes easily soil blowing
437: Preble-----	Severe: seepage	Severe: excess salt piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing
Davey-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
438: Preble-----	Severe: seepage	Severe: excess salt piping	Severe: slow refill cutbanks cave	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing
Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing

Piline-----	Slight	Severe: ponding	Severe: no water	Limitation: percs slowly ponding	Limitation: percs slowly ponding	Limitation: percs slowly ponding
761: Piline-----	Slight	Severe: ponding	Severe: no water	Limitation: percs slowly ponding	Limitation: percs slowly slow intake ponding	Limitation: percs slowly ponding
772: Broyles-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope soil blowing	Limitation: erodes easily too sandy soil blowing
Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope soil blowing	Limitation: erodes easily soil blowing
773: Broyles-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily too sandy soil blowing
774: Broyles-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily too sandy soil blowing
775: Broyles-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: excess salt soil blowing	Limitation: too sandy soil blowing

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Bubus-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Goldrun-----	Severe: seepage	Severe: excess salt seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
780: Dacker-----	Moderate: cemented pan seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
781: Dacker-----	Moderate: cemented pan seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan slope	Limitation: erodes easily cemented pan
Bilbo-----	Severe: seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope droughty	Limitation: large stones percs slowly slope
782: Dacker-----	Moderate: cemented pan seepage	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
Devada-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope depth to rock	Limitation: large stones slope depth to rock
Snowmore-----	Severe: slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope soil blowing depth to rock	Limitation: cemented pan slope depth to rock
790: Rio King-----	Moderate: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Favorable	Favorable
Clementine-----	---	---	---	---	---	---
791: Rio King-----	Moderate: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: excess salt	Favorable

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
800: Udelope-----	Severe: slope depth to rock	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
Bregar-----	Severe: depth to rock	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones depth to rock
Rock Outcrop----	---	---	---	---	---	---
801: Udelope-----	Severe: slope depth to rock	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
Hackwood-----	Severe: slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope	Limitation: erodes easily slope
Tusel-----	Severe: slope	Moderate: large stones thin layer	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones slope
810: Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Goldrun-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
811: Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: excess salt fast intake soil blowing	Limitation: erodes easily soil blowing
813: Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
815: Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
Prideen-----	Slight	Severe: excess salt piping	Severe: slow refill salty water	Limitation: excess salt frost action	Limitation: erodes easily percs slowly wetness	Limitation: erodes easily wetness
Wendane-----	Moderate: seepage	Severe: excess sodium excess salt	Severe: slow refill salty water	Limitation: excess salt flooding frost action	Limitation: erodes easily flooding wetness	Limitation: erodes easily wetness
818: Batan-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: excess salt fast intake soil blowing	Limitation: erodes easily soil blowing
Bubus-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope soil blowing	Limitation: erodes easily soil blowing
Goldrun-----	Severe: seepage slope	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
823: Whirlo-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt slope	Limitation: erodes easily
Orovada-----	Moderate: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily slope soil blowing	Limitation: erodes easily soil blowing
Snapp-----	Moderate: seepage slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope droughty	Limitation: too sandy
825: Whirlo-----	Severe: seepage	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: excess salt slope droughty	Favorable
Oxcorel-----	Severe: seepage	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: excess sodium percs slowly slope	Favorable

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Weso-----	Severe: seepage	Moderate: excess salt seepage piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily too sandy soil blowing
831: Boton-----	Slight	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
Playas-----	Slight	Severe: excess salt hard to pack ponding	Severe: slow refill salty water	Limitation: flooding percs slowly ponding	Limitation: percs slowly ponding droughty	Limitation: erodes easily percs slowly ponding
833: Boton-----	Slight	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily soil blowing
Isolde-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
Boton-----	Slight	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily fast intake soil blowing	Limitation: erodes easily soil blowing
834: Boton-----	Slight	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: excess salt fast intake soil blowing	Limitation: erodes easily soil blowing
Davey-----	Severe: seepage	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake soil blowing droughty	Limitation: too sandy soil blowing
840: Dugchip-----	Moderate: cemented pan slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan too sandy
Flue-----	Severe: seepage	Severe: excess sodium	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan soil blowing
Dewar-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: erodes easily cemented pan

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
842: Dugchip-----	Moderate: cemented pan slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan too sandy
Kelk-----	Slight	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily flooding percs slowly	Limitation: erodes easily percs slowly
844: Dugchip-----	Moderate: cemented pan slope	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan too sandy
Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope	Limitation: erodes easily cemented pan
845: Dugchip-----	Moderate: cemented pan	Severe: excess sodium seepage	Severe: no water	Limitation: deep to water	Limitation: cemented pan percs slowly soil blowing	Limitation: erodes easily cemented pan too sandy
Needle Peak----	Slight	Moderate: piping	Severe: slow refill	Limitation: deep to water	Limitation: erodes easily excess salt	Limitation: erodes easily
860: Goosel-----	Moderate: cemented pan seepage depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope soil blowing	Limitation: erodes easily cemented pan depth to rock
Devada-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope depth to rock	Limitation: large stones slope depth to rock

Zevadez-----	Slight	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: percs slowly rooting depth soil blowing	Limitation: erodes easily percs slowly soil blowing
Snowmore-----	Moderate: cemented pan slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope depth to rock	Limitation: cemented pan depth to rock
983: Snowmore-----	Moderate: cemented pan slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope soil blowing depth to rock	Limitation: cemented pan soil blowing depth to rock

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Devada-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope depth to rock	Limitation: large stones slope depth to rock
984: Snowmore-----	Moderate: cemented pan slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope soil blowing depth to rock	Limitation: cemented pan soil blowing depth to rock
Vanwyper-----	Severe: slope	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones slope depth to rock
Devada-----	Severe: depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope depth to rock	Limitation: large stones percs slowly depth to rock
990: Playas-----	Slight	Severe: excess salt hard to pack ponding	Severe: slow refill salty water	Limitation: flooding percs slowly ponding	Limitation: percs slowly ponding droughty	Limitation: erodes easily percs slowly ponding
994: Dune Land-----	Severe: seepage slope	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
995: Dune Land-----	Severe: seepage slope	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
Goldrun-----	Severe: seepage slope	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
Davey-----	Severe: seepage	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: too sandy soil blowing
998: Dumps-----	Severe: seepage slope	Severe: large stones seepage	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones slope
Pits-----	Severe: depth to rock	Slight	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: depth to rock

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
999: Slickens-----	Slight	Severe: excess salt	Severe: no water	Limitation: deep to water	Limitation: erodes easily soil blowing droughty	Limitation: erodes easily soil blowing
1004: Soughe-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
Davey-----	Severe: seepage slope	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
1005: Flue-----	Severe: seepage	Severe: excess sodium	Severe: no water	Limitation: deep to water	Limitation: cemented pan percs slowly slope	Limitation: erodes easily cemented pan percs slowly
Soughe-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: erodes easily slope depth to rock
Soughe-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
1007: Soughe-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
Puett-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock	Limitation: slope depth to rock
Burrita-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: large stones percs slowly slope	Limitation: large stones slope depth to rock
1010: Bartome-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan soil blowing	Limitation: cemented pan soil blowing
Chiara-----	Severe: cemented pan	Severe: piping	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan soil blowing

1240: Laped-----	Severe: cemented pan slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: large stones slope depth to rock
1241: Laped-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope depth to rock	Limitation: cemented pan depth to rock

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
Boger-----	Severe: cemented pan depth to rock	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: cemented pan large stones depth to rock
1255: Dutchjohn-----	Severe: seepage slope	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: rooting depth slope	Limitation: erodes easily slope too sandy
Cleavage-----	Severe: slope depth to rock	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones slope depth to rock	Limitation: large stones slope depth to rock
Bregar-----	Severe: depth to rock	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones slope droughty	Limitation: large stones depth to rock
Cumulic Haplaquolls----	---	---	---	---	---	---
1260: Weso-----	Severe: seepage	Moderate: excess salt seepage piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily excess salt soil blowing	Limitation: erodes easily too sandy soil blowing
Trocken-----	Moderate: seepage	Severe: large stones	Severe: no water	Limitation: deep to water	Limitation: large stones droughty	Limitation: large stones too sandy
1271: Gol-----	Severe: slope depth to rock	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: slope depth to rock
Say-----	Severe: seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: slope depth to rock droughty	Limitation: large stones slope depth to rock
Rock Outcrop----	---	---	---	---	---	---
1285: Igdell-----	Moderate: cemented pan seepage slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan percs slowly slope	Limitation: cemented pan percs slowly
Gochea-----	Severe: seepage slope	Severe: seepage	Severe: no water	Limitation: deep to water	Limitation: slope droughty	Limitation: slope
Cumulic Haplaquolls----	---	---	---	---	---	---

TABLE 11.--WATER MANAGEMENT--Continued

Map symbol and soil name	Limitations for--			Features affecting--		
	Pond reservoir areas	Embankments, dikes, and levees	Aquifer-fed excavated ponds	Drainage	Irrigation	Terraces and diversions
1291: Tresed-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: fast intake percs slowly soil blowing	Limitation: erodes easily soil blowing
Isolde-----	Severe: seepage slope	Severe: seepage piping	Severe: no water	Limitation: deep to water	Limitation: fast intake slope droughty	Limitation: slope too sandy soil blowing
1292: Tresed-----	Moderate: seepage	Severe: excess salt piping	Severe: no water	Limitation: deep to water	Limitation: fast intake percs slowly soil blowing	Limitation: erodes easily soil blowing
1310: Dewar-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan slope	Limitation: erodes easily cemented pan
Tenabo-----	Severe: cemented pan seepage	Severe: excess sodium excess salt seepage	Severe: no water	Limitation: deep to water	Limitation: cemented pan soil blowing droughty	Limitation: erodes easily cemented pan too sandy
1312: Dewar-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan soil blowing	Limitation: erodes easily cemented pan soil blowing
Dacker-----	Severe: slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan slope
Dewar-----	Severe: cemented pan slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: cemented pan slope soil blowing	Limitation: erodes easily cemented pan slope
1313: Dewar-----	Severe: cemented pan slope	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan slope	Limitation: erodes easily cemented pan slope
Sodhouse-----	Severe: cemented pan seepage	Moderate: seepage piping	Severe: no water	Limitation: deep to water	Limitation: erodes easily cemented pan slope	Limitation: erodes easily cemented pan
Midraw-----	Severe: cemented pan	Severe: thin layer	Severe: no water	Limitation: deep to water	Limitation: percs slowly slope depth to rock	Limitation: cemented pan percs slowly depth to rock

TABLE 11.--WATER MANAGEMENT--Continued

TABLE 17.--CLASSIFICATION OF THE SOILS

(An asterisk in the first column indicates that the soil is a taxadjunct to the series. See text for a description of those characteristics that are outside the range of the series)

Soil name	Family or higher taxonomic class
Acrelane-----	Aridic Argixerolls, loamy-skeletal, mixed, mesic, shallow
Adelaide-----	Entic Durorthids, loamy, mixed, mesic, shallow
Alyan-----	Aridic Argixerolls, fine, montmorillonitic, frigid
Anawalt-----	Lithic Xerollic Haplargids, clayey, montmorillonitic, frigid
Argenta-----	Aeric Halaquepts, coarse-loamy, mixed (calcareous), mesic
Atlow-----	Lithic Xerollic Haplargids, loamy-skeletal, mixed, mesic
Aycab-----	Pachic Cryoborolls, coarse-loamy, mixed
Barnard-----	Aridic Durixerolls, fine, montmorillonitic, mesic
Bartome-----	Xerollic Durargids, loamy, mixed, mesic, shallow
Batan-----	Durorthidic Torriorthents, fine-silty, mixed (calcareous), mesic
Beeox-----	Duric Natrargids, fine, montmorillonitic, mesic
Benin-----	Typic Torriorthents, fine, montmorillonitic (calcareous), mesic
Beoska-----	Duric Natrargids, fine-loamy, mixed, mesic
Bilbo-----	Xerollic Haplargids, clayey-skeletal, montmorillonitic, mesic
Blackhawk-----	Entic Durorthids, loamy, mixed, mesic, shallow
Bliss-----	Haploxerollic Durorthids, coarse-loamy, mixed, mesic
Bloor-----	Durixerollic Natrargids, fine-silty, mixed, mesic
Bluewing-----	Typic Torriorthents, sandy-skeletal, mixed, mesic
Boger-----	Xerollic Durorthids, loamy-skeletal, mixed, mesic, shallow
Boton-----	Durorthidic Torriorthents, fine-silty, mixed (calcareous), mesic
Bregar-----	Lithic Xerollic Haplargids, loamy-skeletal, mixed, frigid
Broyles-----	Duric Camborthids, coarse-loamy, mixed, mesic
Bubus-----	Durorthidic Torriorthents, coarse-loamy, mixed (calcareous), mesic
Bullump-----	Pachic Argixerolls, loamy-skeletal, mixed, frigid
Burrita-----	Lithic Xerollic Haplargids, clayey-skeletal, montmorillonitic, mesic
Carstump-----	Aridic Calcic Argixerolls, clayey-skeletal, montmorillonitic, frigid
Charwell-----	Abruptic Aridic Durixerolls, very-fine, montmorillonitic, frigid
Chiara-----	Xerollic Durorthids, loamy, mixed, mesic, shallow
Cleavage-----	Lithic Argixerolls, loamy-skeletal, mixed, frigid
Clementine-----	Cumulic Endoaquolls, fine-silty, mixed, mesic
Climine-----	Pachic Haploxerolls, loamy-skeletal, mixed, frigid
Clurde-----	Durixerollic Camborthids, fine-loamy, mixed, mesic
Connel-----	Durixerollic Camborthids, coarse-loamy over sandy or sandy-skeletal, mixed, mesic
Cotant-----	Aridic Argixerolls, clayey, montmorillonitic, frigid, shallow
Cresal-----	Durorthidic Torriorthents, coarse-silty, mixed (calcareous), mesic
Croesus-----	Pachic Cryoborolls, loamy-skeletal, mixed
Dacker-----	Xerollic Durargids, fine-loamy, mixed, mesic
Davey-----	Xerollic Camborthids, sandy, mixed, mesic
Delvada-----	Cumulic Endoaquolls, fine, montmorillonitic (calcareous), mesic
Devada-----	Lithic Argixerolls, clayey, montmorillonitic, mesic
Dewar-----	Xerollic Durargids, loamy, mixed, mesic, shallow
Dugchip-----	Xerollic Nadurargids, fine-loamy, mixed, mesic
Dun Glen-----	Typic Camborthids, coarse-loamy, mixed, mesic
Dutchjohn-----	Aridic Argixerolls, loamy-skeletal, mixed, frigid
Eaglerock-----	Aridic Argixerolls, loamy-skeletal, mixed, mesic
Enko-----	Durixerollic Camborthids, coarse-loamy, mixed, mesic
Erakatak-----	Typic Argixerolls, clayey-skeletal, montmorillonitic, frigid
Essal-----	Typic Torriorthents, coarse-loamy over sandy or sandy-skeletal, mixed (calcareous), mesic
Flue-----	Xerollic Nadurargids, fine, montmorillonitic, mesic
Genaw-----	Xerollic Haplargids, loamy, mixed, mesic, shallow
Gochea-----	Durargidic Argixerolls, fine-loamy, mixed, frigid
Gol-----	Xerollic Haplargids, loamy-skeletal, mixed, frigid, shallow
Golconda-----	Haplic Nadurargids, fine-loamy, mixed, mesic
Goldrun-----	Xeric Torripsamments, mixed, mesic
Golsun-----	Aridic Calcic Argixerolls, clayey-skeletal, montmorillonitic, frigid
Goosel-----	Xerollic Durargids, fine, montmorillonitic, mesic
Gosumi-----	Aridic Argixerolls, clayey-skeletal, montmorillonitic, frigid
Gowjai-----	Aridic Argixerolls, loamy-skeletal, mixed, frigid
Hackwood-----	Pachic Cryoborolls, fine-loamy, mixed

TABLE 17.--CLASSIFICATION OF THE SOILS--Continued

Soil name	Family or higher taxonomic class
Harcany-----	Pachic Cryoborolls, loamy-skeletal, mixed
Havingdon-----	Xerollic Haplargids, clayey-skeletal, montmorillonitic, mesic
Hawesley-----	Typic Torripsamments, mixed, mesic
Hoot-----	Lithic Haplargids, loamy-skeletal, mixed, mesic
Humboldt-----	Fluvaquentic Endoaquolls, fine, montmorillonitic (calcareous), mesic
Hunnton-----	Xerollic Durargids, fine, montmorillonitic, mesic
Igdell-----	Abruptic Aridic Durixerolls, fine, montmorillonitic, frigid
Isolde-----	Typic Torripsamments, mixed, mesic
Kelk-----	Durixerollic Camborthids, fine-silty, mixed, mesic
Kingsriver-----	Cumulic Endoaquolls, coarse-loamy, mixed, mesic
Kleck-----	Xerollic Camborthids, loamy, mixed, mesic, shallow
Knott-----	Typic Nadurargids, clayey, montmorillonitic, mesic, shallow
Kortty-----	Duric Haplargids, fine-loamy, mixed, mesic
Laped-----	Typic Durargids, loamy, mixed, mesic, shallow
Layview-----	Argic Lithic Cryoborolls, loamy-skeletal, mixed
Linrose-----	Aridic Haploxerolls, loamy-skeletal, mixed, frigid
Locane-----	Lithic Xerollic Haplargids, clayey-skeletal, montmorillonitic, frigid
Longcreek-----	Lithic Argixerolls, clayey-skeletal, montmorillonitic, mesic
Lunder-----	Abruptic Aridic Durixerolls, clayey, montmorillonitic, mesic, shallow
Madeline-----	Lithic Argixerolls, clayey, montmorillonitic, frigid
Mazuma-----	Typic Torriorthents, coarse-loamy, mixed (calcareous), mesic
McConnel-----	Xerollic Camborthids, sandy-skeletal, mixed, mesic
Menbo-----	Pachic Argixerolls, clayey-skeletal, montmorillonitic, frigid
Midraw-----	Xerollic Durargids, clayey, montmorillonitic, mesic, shallow
Mulhop-----	Lithic Xerollic Calciorrhids, loamy-skeletal, mixed, frigid
Needle Peak-----	Oxyaquic Torriorthents, fine-silty, mixed (calcareous), mesic
Ninemile-----	Lithic Argixerolls, clayey, montmorillonitic, frigid
Nomara-----	Calcic Pachic Argixerolls, loamy-skeletal, mixed, frigid
Ola-----	Pachic Haploxerolls, coarse-loamy, mixed, frigid
Orovada-----	Durixerollic Camborthids, coarse-loamy, mixed, mesic
Oxcorel-----	Duric Natrargids, fine, montmorillonitic, mesic
Panlee-----	Xerollic Camborthids, loamy-skeletal, mixed, mesic
Paranat-----	Fluvaquentic Endoaquolls, fine-silty, mixed (calcareous), mesic
Piline-----	Xeric Epiaquerts, fine, montmorillonitic, mesic
Pocan-----	Xerollic Camborthids, fine-loamy, mixed, mesic
Preble-----	Oxyaquic Torriorthents, coarse-loamy, mixed (calcareous), mesic
Prideen-----	Aquic Durorthidic Torriorthents, fine-silty, mixed (calcareous), mesic
Puett-----	Xeric Torriorthents, loamy, mixed (calcareous), mesic, shallow
Puffer-----	Lithic Xeric Torriorthents, loamy-skeletal, mixed (calcareous), mesic
Pumper-----	Typic Camborthids, sandy-skeletal, mixed, mesic
Quomus-----	Aridic Duric Haploxerolls, coarse-loamy, mixed, frigid
Rad-----	Durixerollic Camborthids, coarse-silty, mixed, mesic
Raglan-----	Duric Camborthids, fine-loamy, mixed, mesic
Rebel-----	Xerollic Camborthids, coarse-loamy, mixed, mesic
Relley-----	Duric Camborthids, fine-silty, mixed, mesic
Reluctan-----	Aridic Argixerolls, fine-loamy, mixed, frigid
Rio King-----	Aridic Haploxerolls, coarse-loamy, mixed, mesic
Roca-----	Xerollic Haplargids, clayey-skeletal, montmorillonitic, frigid
Rocconda-----	Lithic Xerollic Haplargids, clayey-skeletal, montmorillonitic, mesic
Rodock-----	Aridic Duric Haploxerolls, loamy-skeletal, mixed, mesic
Rose Creek-----	Fluvaquentic Endoaquolls, coarse-loamy, mixed (calcareous), mesic
Say-----	Aridic Argixerolls, fine-loamy, mixed, frigid
Shabliss-----	Haploxerollic Durorthids, loamy, mixed, mesic, shallow
Siscab-----	Aridic Argixerolls, loamy, mixed, mesic, shallow
Snapp-----	Durixerollic Natrargids, clayey over sandy or sandy-skeletal, montmorillonitic, mesic
Snowmore-----	Xerollic Durargids, fine-loamy, mixed, mesic
Sodhouse-----	Typic Durorthids, loamy, mixed, mesic, shallow
Softscrabble-----	Pachic Argixerolls, loamy-skeletal, mixed, frigid
Sojur-----	Lithic Torriorthents, loamy-skeletal, mixed (calcareous), mesic
Sonoma-----	Aeric Fluvuquents, fine-silty, mixed (calcareous), mesic
Soolake-----	Typic Torriorthents, sandy, mixed, mesic
Soughe-----	Lithic Xerollic Haplargids, loamy-skeletal, mixed, mesic
Spinlin-----	Argic Cryoborolls, clayey-skeletal, montmorillonitic
Sumine-----	Aridic Argixerolls, loamy-skeletal, mixed, frigid

TABLE 17.--CLASSIFICATION OF THE SOILS--Continued

Soil name	Family or higher taxonomic class
Tenabo-----	Typic Nadurargids, loamy, mixed, mesic, shallow
Theon-----	Lithic Haplargids, loamy-skeletal, mixed, mesic
Tosp-----	Pachic Cryoborolls, coarse-loamy, mixed
Tresed-----	Typic Torriorthents, clayey over loamy, montmorillonitic (calcareous), mesic
Trocken-----	Typic Torriorthents, loamy-skeletal, mixed (calcareous), mesic
Trunk-----	Xerollic Haplargids, fine, montmorillonitic, mesic
Tusel-----	Argic Pachic Cryoborolls, loamy-skeletal, mixed
Tusk-----	Pachic Argixerolls, fine-loamy, mixed, frigid
Udelope-----	Lithic Cryoborolls, loamy, mixed
Valmy-----	Durorthidic Torriorthents, coarse-loamy, mixed (calcareous), mesic
Vanwyper-----	Xerollic Haplargids, clayey-skeletal, montmorillonitic, mesic
Walti-----	Aridic Argixerolls, fine, montmorillonitic, frigid
Wendane-----	Aeric Halaquepts, fine-silty, mixed (calcareous), mesic
Weso-----	Duric Camborthids, coarse-loamy, mixed, mesic
Westbutte-----	Pachic Haploxerolls, loamy-skeletal, mixed, frigid
Whirlo-----	Typic Camborthids, loamy-skeletal, mixed, mesic
Wholan-----	Typic Camborthids, coarse-silty, mixed, mesic
Wieland-----	Durixerollic Haplargids, fine, montmorillonitic, mesic
Wiskan-----	Xerollic Haplargids, loamy-skeletal, mixed, frigid
Xine-----	Aridic Calcixerolls, loamy-skeletal, mixed, frigid
Xipe-----	Fluvaquentic Endoaquolls, fine-silty over sandy or sandy-skeletal, mixed, mesic
Zevadez-----	Durixerollic Haplargids, fine-loamy, mixed, mesic
Zymans-----	Aridic Argixerolls, fine, montmorillonitic, mesic

NRCS Accessibility Statement

The Natural Resources Conservation Service (NRCS) is committed to making its information accessible to all of its customers and employees. If you are experiencing accessibility issues and need assistance, please contact our Helpdesk by phone at 1-800-457-3642 or by e-mail at ServiceDesk-FTC@ftc.usda.gov. For assistance with publications that include maps, graphs, or similar forms of information, you may also wish to contact our State or local office. You can locate the correct office and phone number at <http://offices.sc.egov.usda.gov/locator/app>.

Each area outlined on this map consists of more than one kind of soil. The map is thus meant for general planning rather than a basis for decisions on the use of specific tracts.

SOIL LEGEND*

- AREAS DOMINATED BY SOILS AND PLAYAS ON BOLSON FLOORS, INSET FANS, AND ALLUVIAL FANS
- 1 Playas
 - 2 Mazuma-Ragtown-Trocken
 - 3 Trocken-Bluwieg
 - 4 Typic Torriorthents-Trocken-Smaug
 - 5 Juva-Umberland-Mazuma
 - 6 Gitakup-Chuckles-Ragtown
- AREAS DOMINATED BY SOILS ON FAN PIEDMONTS, ALLUVIAL FANS, AND LAKE PLAINS
- 7 Jervai-Dorper
 - 8 Buffaran-Fulstone-Phing
 - 9 Veta-Haybourne
 - 10 Leviathan-Haybourne-Springmeyer
- AREAS DOMINATED BY SOILS AND ROCK OUTCROP ON HILLS AND LOW PLATEAUS
- 11 Slocave-Kaffur-Rock outcrop
 - 12 Coppereid-Foxcan-Sojur
 - 13 Jaybee-Old Camp-Pickup
- AREAS DOMINATED BY SOILS AND ROCK OUTCROP ON MOUNTAINS AND PLATEAUS
- 14 Devada-Tunnison-Softscrabble
 - 15 Reywat-Wylo-Old Camp
 - 16 Softscrabble-Terca-Hutchley
 - 17 Graufels-Glenbrook-Rock outcrop
 - 18 Berit-Hastee-Rock outcrop
 - 19 Home Camp-Newlands-Hinemile

SOIL LEGEND

Map unit symbols consist of three and four digit numbers. The symbols are not connotative.

SYMBOL	NAME	SYMBOL	NAME
100	Anawalt-Vanwyper-Alyan association	403	Orovada fine sandy loam, 0 to 2 percent slopes 1/
101	Anawalt-Ninemile-Alyan association	406	Orovada very fine sandy loam, 2 to 8 percent slopes 1/
102	Anawalt-Ninemile-Tusk association	407	Orovada loam, 0 to 2 percent slopes 1/
106	Anawalt-Ninemile-Alyan association, cool	409	Orovada-Goldrun association
107	Anawalt-Ninemile-Tusk association, cool	410	Orovada-Bliss association
108	Anawalt-Ninemile-Alyan association, steep	411	Orovada-Dugchip association
110	Adelaide silt loam, 2 to 8 percent slopes 1/	417	Orovada-Connel complex, 0 to 2 percent slopes 1/
120	Bregar-Tusk association	420	Bubus silt loam, 0 to 2 percent slopes 1/
122	Bregar-Tusel-Cleavage association	431	Preble very fine sandy loam 1/
131	Benin silt loam 1/	432	Preble-Goldrun-Playas association
133	Benin silt loam, sodic 1/	435	Preble silt loam 1/
141	Beoska-Bluwewing association	436	Preble-Valmy association
143	Beoska-Broyles association	437	Preble-Davey association
144	Beoska-Dun Glen association	438	Preble-Bubus association
145	Beoska-Weso association	440	Prideen silt loam, strongly saline 1/
151	Blackhawk silt loam, 0 to 2 percent slopes 1/	441	Prideen silt loam 1/
152	Blackhawk silt loam, 2 to 8 percent slopes	452	Kingsriver loam, 0 to 2 percent slopes 1/
154	Blackhawk-Golconda-Orovada association	453	Kingsriver loam, drained, 0 to 2 percent slopes 1/
155	Blackhawk loamy fine sand, 0 to 2 percent slopes 1/	460	Rad loamy fine sand, 4 to 8 percent slopes 1/
156	Blackhawk-Clurde association	461	Rad fine sandy loam, 0 to 2 percent slopes 1/
157	Blackhawk-Broyles association	462	Rad fine sandy loam, 2 to 4 percent slopes 1/
158	Blackhawk-Trocken association	470	Raglan silt loam, 0 to 2 percent slopes 1/
160	Bliss fine sandy loam, 2 to 8 percent slopes 1/	471	Raglan silt loam, strongly saline, 0 to 2 percent slopes 1/
161	Bliss-Chiara association	474	Raglan-Kleck complex, 0 to 2 percent slopes
163	Bliss-Shabliss association	480	Rebel loam, 0 to 2 percent slopes 1/
165	Bliss-Dugchip-Orovada association	487	Rebel fine sandy loam, 0 to 2 percent slopes 1/
166	Bliss-Orovada-Shabliss association	490	Rose Creek loam 1/
167	Bliss-Blackhawk-Adelaide association	491	Rose Creek silt loam, drained 1/
169	Bliss-Orovada association	501	Enko loamy very fine sand, 0 to 2 percent slopes 1/
171	Bubus very fine sandy loam, moderately saline, 0 to 2 percent slopes 1/	502	Enko-Goldrun association
174	Bubus-Needle Peak association	503	Enko very fine sandy loam, 0 to 2 percent slopes 1/
178	Bubus-Preble complex, 0 to 2 percent slopes 1/	504	Enko-Shabliss complex, 2 to 8 percent slopes
184	Chiara-McConnel association	505	Enko very fine sandy loam, 2 to 8 percent slopes 1/
185	Chiara-Dacker-McConnel association	507	Enko-Shabliss-Orovada association
186	Chiara-Hunnton association	511	Mazuma-Trocken association
187	Chiara-Boger association	520	Lunder-Devada association
188	Chiara association	522	Lunder-Hunnton association
190	Beexo-Oxcorel association	530	Shabliss very fine sandy loam, 2 to 15 percent slopes
191	Beexo-Connel association	532	Shabliss-Enko-Valmy association
192	Beexo-Bliss association	533	Shabliss-Connel association
200	Davey loamy fine sand, moderately saline, 2 to 4 percent slopes 1/	534	Shabliss-Puett association
201	Davey loamy fine sand, 2 to 8 percent slopes 1/	536	Shabliss-Enko-Dugchip association
202	Davey loamy fine sand, 0 to 2 percent slopes 1/	537	Shabliss-Bliss-Genaw association
203	Davey-Goldrun association	543	Pumper-Connel association
204	Davey-Blackhawk association	544	Pumper-Weso association
205	Davey-Hawsley association	545	Pumper-Dun Glen-Davey association
206	Davey-Broyles-Dun Glen association	551	Ninemile-Carstump association
207	Davey-Pumper association	552	Ninemile-Vanwyper association
208	Davey fine sandy loam, 0 to 2 percent slopes 1/	553	Ninemile-Tusk association
210	Flue-Connel association	555	Ninemile-Tusel-Alyan association
211	Flue-Golconda-Snapp association	557	Ninemile very stony loam, 4 to 15 percent slopes
212	Flue-Orovada association	558	Ninemile-Anawalt-Vanwyper association
213	Flue-Puett association	559	Ninemile-Devada-Rock outcrop association
215	Flue-Snapp association	561	Sonoma silt loam, strongly saline 1/
216	Flue very fine sandy loam, 2 to 4 percent slopes 1/	562	Sonoma silty clay loam, occasionally flooded 1/
217	Flue loam, 0 to 2 percent slopes 1/	563	Sonoma silty clay loam, strongly saline 1/
218	Flue-Snapp-Rodock association	564	Sonoma silt loam, drained 1/
222	Bloor very fine sandy loam, 0 to 2 percent slopes 1/	566	Sonoma-Paranat complex 1/
231	Dun Glen very fine sandy loam, 2 to 4 percent slopes 1/	567	Sonoma silty clay loam, frequently flooded 1/
233	Dun Glen very fine sandy loam, 0 to 2 percent slopes 1/	573	Spinlin-Harcany-Hackwood association
241	Sojur extremely channery silt loam, 15 to 50 percent slopes	574	Spinlin-Hackwood-Tusel association
250	Connel-Davey-Goldrun complex, 4 to 30 percent slopes 1/	580	Sumine-Ninemile-Softscrabble association
251	Connel very fine sandy loam, 2 to 4 percent slopes 1/	581	Sumine-Gosumi-Nomara association
252	Connel gravelly fine sandy loam, 0 to 2 percent slopes 1/	582	Sumine-Ninemile-Anawalt association
253	Connel-McConnel complex, 0 to 2 percent slopes 1/	583	Sumine-Gosumi-Harcany association
254	Connel-Zevadez association	584	Sumine-Ninemile-Tusel association
255	Connel-McConnel complex, rarely flooded, 0 to 2 percent slopes 1/	585	Sumine-Rock outcrop-Ninemile association
257	Connel very fine sandy loam, 0 to 2 percent slopes 1/	586	Sumine-Rubble land-Reluctan association
258	Connel very fine sandy loam, slightly saline, 0 to 2 percent slopes 1/	587	Sumine-Gosumi-Harcany association, cool
262	Golconda-Snapp association	588	Sumine-Cleavage-Rubble land association
263	Golconda-Bliss-Connel association	589	Sumine-Ninemile-Harcany association
270	Goldrun fine sand, 2 to 15 percent slopes 1/	590	Trunk-Madeline association
271	Goldrun loamy fine sand, 0 to 2 percent slopes 1/	592	Trunk-Pocan association
272	Goldrun loamy fine sand, 2 to 4 percent slopes 1/	593	Trunk-Vanwyper-Panlee association
274	Goldrun-Benin complex, 0 to 15 percent slopes 1/	594	Trunk-Burrita-Quomus association
275	Goldrun-Preble complex, 0 to 15 percent slopes 1/	596	Trunk-Burrita association
281	Golsum-Spinlin-Harcany association	597	Trunk, gravelly-Burrita association
290	Havingdon-Burrita association	600	Valmy fine sandy loam, 0 to 2 percent slopes 1/
292	Havingdon-Gowjai-Walti association	603	Valmy-Goldrun complex, 0 to 8 percent slopes 1/
302	Essal-Playas-Isolde association	604	Valmy-Bubus-Needle Peak complex, 0 to 2 percent slopes
305	Essal-Isolde Hawsley association	606	Valmy loam, 0 to 2 percent slopes 1/
307	Essal-Tresed-Isolde association	611	Weso loamy sand, 4 to 8 percent slopes 1/
311	Harcany-Croesus-Hackwood association	613	Weso-Orovada-Shabliss association
312	Harcany-Hackwood-Cleavage association	614	Weso silt loam, moderately saline, 0 to 2 percent slopes 1/
321	Humboldt silty clay loam 1/	615	Weso fine sandy loam, 0 to 2 percent slopes 1/
322	Humboldt silty clay loam, strongly saline 1/	617	Weso loam, 2 to 4 percent slopes 1/
325	Humboldt-Wendane complex 1/	618	Weso-Kelk association
330	McConnel fine sandy loam, 0 to 2 percent slopes 1/	619	Weso-Rebel complex, 0 to 2 percent slopes 1/
331	McConnel gravelly fine sandy loam, 2 to 8 percent slopes	620	Carstump-Soughe-Ninemile association
333	McConnel-Shabliss association	631	Burrita-Panlee association
335	McConnel very gravelly fine sandy loam, 0 to 2 percent slopes 1/	633	Walti-Midraw association
338	McConnel-Pumper-Whirlo complex, 2 to 8 percent slopes	634	Burrita-Devada-Zymans association
340	Boger-Soughe association	636	Burrita-Rubble land-Clementine association
342	Boger-Gosel-Soughe association	637	Burrita-Dewar association
343	Boger cobbly silt loam, 2 to 4 percent slopes	638	Burrita-Soughe-Panlee association
351	Goldrun-Prideen-Playas complex, 0 to 15 percent slopes	640	Clementine silt loam, drained 1/
352	Goldrun-Kleck-Davey complex, 0 to 15 percent slopes 1/	641	Clementine, drained-Paranat complex 1/
360	Needle Peak silt loam 1/	642	Clementine-Rose Creek complex 1/
363	Needle Peak-Batan-Goldrun association	646	Clementine Paranat complex 1/
370	Wieland association	651	Burrita-Soughe-Atlow association
380	Bullump-Tusel association	652	Burrita-Havingdon-Reluctan association
381	Bullump-Tusel-Hackwood association	653	Burrita-Vanwyper-Havingdon association
391	Aycab-Rock outcrop association

MISCELLANEOUS WATER FEATURES

This soil survey was compiled by the U.S. Department of Agriculture, Natural Resources Conservation Service, formerly Soil Conservation Service, and cooperating agencies. Base maps are orthophotographs prepared by the U.S. Department of Interior, Geological Survey, from 1975 aerial photography.

North American Datum of 1927 (NAD27), Clarke 1866 Spheroid
1000-meter ticks: Universal Transverse Mercator, zone 11.
Coordinate grid ticks and land division data, if shown, are approximately positioned. Digital data are available for this quadrangle.
